Airway, Breathing, and
Circulation**

**Medical Emergencies: CPR,
Toxicology, and Wilderness**

**Trauma Emergencies and
Care**

**Emergency Care: Pregnancy,
Infants, and Children**

**Prepare for the EMT
Certification Test**

Jul 29, 2025

King Wa TAM

has successfully completed the online, non-credit Specialization

Become an EMT

In this specialization the learner gained the knowledge essential to provide prehospital care at the level of an emergency medical technician and learned the critical components of the associated required hands on skills. This includes caring for stable and unstable patients before they get to a hospital, identifying time sensitive diseases, and medical and traumatic conditions that affect both adults and pediatric patients. The application of emergent patient care, stabilization and recognition of disease processes was evaluated in the final course in preparation for the U.S. National Registry of Emergency Medical Technicians (NREMT) exam or other health care pursuits.

Whitney Barrett, MD
Assistant Professor,
Emergency Medicine -
University of Colorado -
Anschutz Medical
Campus;
Associate Medical
Director - Denver
Health Paramedic
Division

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
