

3 Courses

**Anatomy & Physiology:
Levels of Organization**

**Anatomy & Physiology:
Support & Movement**

**Anatomy & Physiology:
Regulation, Integration, &
Control**

Jun 30, 2024

King Wa TAM

has successfully completed the online, non-credit Specialization

Human Anatomy & Physiology I

Through completing this Specialization, you received an introduction to human anatomy and physiology. Together with your peers and the instructor, you have explored foundational concepts as well as the structure and function of the human body as it pertains to five major body systems: the integumentary (skin), skeletal, muscular, nervous, and endocrine (hormone) systems. You have also successfully completed all the required assessments to demonstrate your newly gained skills. We, the course team, hope you've found enjoyment in exploring the mystery and marvel of the human body.

Laura S. Kabiri, PT, DPT,
PhD, CSCS
Assistant Teaching
Professor and Major
Advisor
Department of
Kinesiology
Wiess School of Natural
Sciences
Rice University

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
