King Wa TAM

has successfully completed the online, non-credit Specialization

Immunology: The Immune System and its Failures

Our online Immunology Specialisation has been developed to provide central concepts in human immunology as well as advanced topics from cutting-edge research relating to clinical disease of the immune system over five designated specialisations. The initial two courses discuss the role of the innate and adaptive immune responses serving to protect the body from harmful pathogens, which if dysregulated can also lead to immune-mediated diseases such as immunodeficiencies, autoimmunity, allergy and chronic infection, evaluated in the remaining three courses.

Dr Sophie Rutschmann
Reader in Immunology

Dr Maggie Trela
Teaching Fellow in
Immunology

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
